me: howdy, I just put up my first post but the fonts and sizes are all crazy
me: http://thefastertimes.com/punditry/2010/08/01/charles-krauthammer-psychic-genius/
me: any way I can fix it?
Sam: yeah. on wordpress there are two rows of editing tools. on the bottom row, there are two little clipwords. copy the text and then click the clipboard with the "W" on it and past it in -- that will fix it
Sam: or you can just first save it as text only in word and then paste it in
me: okay, cool
me: thanks
Sam: thank you. is it the book excerpt that you put up?
me: yep
Sam: cool
Sam: btw, knefel seems like a great find. thanks for making that happen
me: no problem
